Objectives

To become a good researcher in my field (2+years' experience)

ACADEMIC QUALIFICATION

Bachelor of Science in Information Technology *Aug 2023-Dec 2026*

GC University, Hyderabad, Pakistan (https://gcuh.edu.pk/)

Studying information technology with practical experience in software development, networking, databases, and IT infrastructure. Developed academic projects using Flutter and web technologies, including a healthcare application as a final year project. Applied technical skills in a professional IT support role while completing the degree

Diploma of Associate Engineer (DAE) in Software Technology *2021 - 2024*

Sindh Technical Education and Vocational Training Authority (STEVTA) (https://stevta.gos.pk/)

Three-year diploma covering software and IT fundamentals..

Research & Projects

Smart Mediloop System — Final Year Project
Government College University Hyderabad, Pakistan

Collaborating in a four-member team to develop a healthcare application that bridges the communication gap between patients and doctors. The system is designed to collect symptoms through a chatbot, organize patient history, and generate structured reports for

doctor review. It aims to help patients communicate their health concerns clearly and provide doctors with accessible information for consultations and follow-up care.

ResQpk — Smart Ambulance Tracking System

During my bachelor's degree, I worked on ResQpk, a smart ambulance tracking system designed to support ambulance coordination through live location tracking. The project focused on monitoring ambulance movement and improving communication during emergency response.

Carbon Footprint App

During my bachelor's degree, I worked on a Flutter application focused on estimating carbon footprints and promoting environmental awareness. The project involved exploring TensorFlow Lite for machine learning integration and SQLite for local data storage, combining mobile development with an environmental application.

Multi-Site Network Simulation — Cisco Packet Tracer

During my bachelor's degree, I worked on a network simulation connecting three city networks using Cisco Packet Tracer. The project involved configuring routers and implementing the Routing Information Protocol (RIP) to enable communication between the networks. It strengthened my practical understanding of IP addressing, routing, and network connectivity.

Academic Projects

- Smart Mediloop System — Final Year Project
- ResQpk
- Smart Office with IoT
- Money Split App.
- Encryption App

Professional Experience

IT Support Officer
Faizan Online Academy, Dawateislami — Hyderabad, Pakistan
June 2025–Present

- Support and maintain more than 50 Windows computers used for online teaching and administrative operations.
- Perform system administration tasks, including user account management, software installation, updates, and access permissions.
- Maintain file server operations, shared folders, and storage access for staff.

- Manage LAN connectivity and troubleshoot MikroTik routers, switches, and Wi-Fi devices.
- Develop PowerShell scripts to automate recording backups, file organization, and retention.
- Diagnose hardware and software faults, coordinate vendor repairs, and resolve Microsoft Teams, OneDrive, and peripheral issues.

Honors & Achievement

- **Second Place, Project Exhibition** — Awarded at the IT Festival, Government College University Hyderabad.
- **Project Presentation, IT Expo Karachi** — Presented a project before the Chief Minister of Sindh.
- **University Merit Scholarship** — Received a merit scholarship at Government College University Hyderabad.
- **First Place, Debate Competition** — Awarded first position in a debate competition.

Certifications &Trainings

- **Flutter App Development** — Saylani Mass IT Training
- **AI & Data Science** — Saylani Mass IT Training (In progress)
- **Cloud Solution Architecture** — IBA Sukkar (IT Bootcamp)
- **MTCNA** — Udemy
- **Prompt Engineering** — Coursera
- **Microsoft 365** — Honhaar Jawan by Punjab Govt

Extra-Curricular activities

- **Technical Society Member:** Helped organize and deliver training sessions within the university department.
- **Spanish Language Learning:** Pursuing independent Spanish study to develop communication skills.
- **Online Quran Teaching:** Conducted online Quran classes, developing teaching and communication skills.

Personal Data

Date of Birth October 06, 2026

Nationality	Pakistani
NIC	41304-4681309-9
Address :	**House# 168 unit 08 Latifabad Hyderabad**
